

Migration Museum

Story Discs

The Migration Museum has been collecting migration story discs from people living across Britain since 2016. Since then, almost 6000 anonymous story discs have been collected from visitors to the museum and through our education work, showing a snapshot into people's lives and their connections to migration.

The story disc templates below can be printed to be used in school and the accompanying presentation will give you ideas of the activities you can do using the story discs. You can access the presentation [here](#).
